(5 points)

This assignment is to familiarize you with using Canvas for assignments. You have entered the Assignments label or the Course Content icon to get this far. Once you have completed the paper, go back into the assignment and upload it to the assignment and then submit it. After you have submitted it, make sure it exists and that it has the attachment.

For this assignment, write a paper of **at least** one **full** page telling me a little about yourself and why you are enrolled in this course. Make sure your spelling and grammar are correct. Please submit a .doc , .docx, or .pdf file. Please submit a Word file if possible. It makes it easier for the grader or me to insert comments.

When creating your paper, use a standard font such as Arial, Calibri, Helvetica, or Times New Roman of either 10, 11, or 12 size. In addition, use 1" margins all the way around (this might not be your word processing default) and use single space or space and a half at the most for your line spacing. **No extra spacing between paragraphs.**

Use the header feature and insert the following header:

CS 561   Assignment 1   your name

You will use a similar heading on all assignments unless I state otherwise.

Use a footer to show page numbers.

I have put a header and footer on this document to show what I mean. They show up in the 1" margins.

Remember to follow my instructions even if you think your way is better. This applies to all assignments and project submissions.
